SEED Nepal needs Cleaner Production Professionals

Society for Environmental and Economic Development Nepal (SEED Nepal) will be implementing Cleaner Production (CP) in Woolen Yarn Dyeing, Carpet Washing and Pashmina Industries in the Kathmandu Valley as the Implementing Partner of Mercy Corps under the SWITCH-Asia Project under grant assistance of European Commission. SEED Nepal is in need of following Technical professionals for the job:

1. Process Engineer
2. Energy Efficiency Expert (Thermal)
3. Energy Efficiency Expert (Electrical)
4. Occupational Health and Safety (OHS) Expert
5. Chemical Engineer
6. Cleaner Production Expert

The professionals will have to contribute intermittently for the assessment and implementation of CP in the industries belonging to the above three sectors over a period of 18 months as per the need of the assignment. Interested Nepalese professionals are requested to apply with a detailed CV indicating the relevant qualification, experience and also the expectations for the job as remuneration per day before the end of 20 September 2014. Minimum qualification and experience of the above experts will be Master's Degree in Science or Technology or Engineering in the related subject with at least 10 years of experience in the assessment of CP in industries. For applicant with Bachelor's Degree, the experience required will be at least 12 years.
